amc²

One profession, one area of expertise: interior construction and renovation

Founded in 1992, amc² is a general building contractor specialising in interior construction and renovation of professional premises. amc² works closely with both architects and clients to manage and execute structural and installation projects involving all building trades and professions, throughout the whole of France.

amc² specialises predominately in developing interiors frequented by the public, such as shops, restaurants, showrooms, offices and all types of professional work spaces. amc² assists major brand names in the renovation and refit of their sites in France. Inspired by its experience in the luxury sector, amc² now offers its services to private clients on high-end projects.

Key data

amc² – your partner for interior construction and renovation

From the planning phase to delivery of turnkey premises: quality, responsiveness and expertise

amc² provides three service phases

research

The planning phase, managed by the research department, involves analysing the project specifications and the client's needs. Alongside the architect, amc² provides the solutions best suited to the technical, budgetary and time constraints of the project.

management

The amc² operational team comprises project managers, foremen, skilled tradesmen and technicians. All are qualified and experienced in the development of shops, offices and apartments. amc² is Qualifelec-certified, which attests to the quality and durability of the executed installations.

delivery

amc² is committed to meeting its deadlines and providing outstanding quality in the services it offers. In order to meet this objective, its teams consult regularly with the client, architect and administrative authorities to ensure that the installations meet the required standards. Expertise, listening, anticipation and responsiveness are compulsory at amc².
